

The aim of the Cunliffe Day and Work Opportunities Service is to help individuals build their skills and confidence, then move on to other opportunities once they feel confident enough.

Support Worker Feedback

What was the reason for using RITA?	For Supported People to learn about different devices and how to navigate. There is a lot of people we support who do not have Wi-Fi in their homes.
What content did you use in RITA?	We do support people 1:1 to use the RITA and staff have recently learnt how to project the RITA onto a wall or screen to enable some group activities.
What was the outcome?	Using the RITA has helped engaging supported people to talk more about certain topics, i.e. Wrexham FC the old footage, which some people do remember from childhood. Watching on the projected screen also meant that the words attached to photographs were read out aloud so supported people could listen.

The RITA is used as an alternative device for supported people to actively engage in their chosen activities, listen to their favourite music with 1:1 support. We are hoping to develop group activities i.e. bingo and dominoes (once installed) here in the Cunliffe Centre.
