

Pendine Park specialises in supporting those with Dementia in a safe comfortable environment.

Our expert team are very experienced and are chosen for their caring understanding nature, empathy and cheerfulness. Our excellent staffing levels assist our clients to have as much independence and personal support as possible.

Question	Answer
Has the RITA system in your opinion improved the mental health and wellbeing since the RITA system has been introduced?	Yes
Has the RITA system created a calmer environment and improved wellbeing?	Much better - Residents can enjoy group activity or single use and it focus attention on something positive that they enjoy
Have incidences of challenging behaviours reduced since RITA was introduced?	Yes. We find that a range of enrichment activities always reduces behaviours that challenge. When you can focus an individuals mind into something positive then this remains the focus of the individual. I have also noticed that even with residents that are quite incapacitated by the illness they can use some of the apps with great success
Has RITA improved residents engaging in group work activity resulting in greater stimulation & confidence?	Extremely effective - Some of my residents have competitions which they love
Has engagement and interaction with family members and friends improved since using RITA by residents?	Much better
Have incidences of falls decreased since the introduction of RITA or since your last RITA survey?	Yes - this is due to the individual being encouraged to focus on the app and what we have found is that when they mobilise, they are more attentive

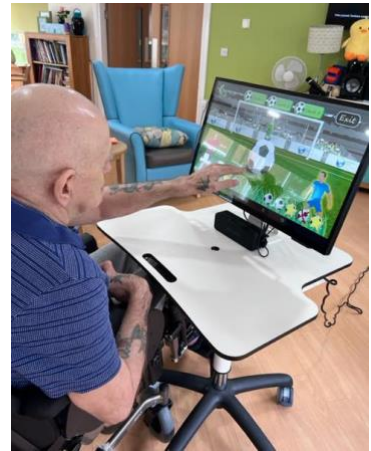

Has the RITA system in your opinion improved the management of falls?	Yes. One of my gentleman tends to continually stand up from his chair, Rita supported him to a more normal lifestyle where he was focussed on the app and enjoyment instead of continually standing up from his chair making him more at risk from falls
Has RITA system Improved mental health and stimulation after residents have returned from hospital/medical treatment and aided their recovery?	Extremely effective - Residents can recall the enjoyment from this appliance
Has the requirement of 1to1 reduced since the RITA system was introduced?	Yes
Have you seen an improvement in food and fluid intake by residents using the RITA system?	Yes. Group activity and social peer group opportunity has increased propensity to enjoy food and fluid in a social manner and as such aided this. Music during mealtimes and relaxed atmosphere has seen people engage better.

Sara from Penybryn enjoyed playing interactive games on RITA 🧡🌈

Playing an interactive footie game in Bodlondeb. Goal!!

Playing an interactive footie game in Bodlondeb. Goal!!

*"RITA is an exceptional addition to our enrichment programme."*
